

## **Student AI Usage Contract**

### **Web Design & Development Program**

#### **Purpose**

This contract outlines expectations for the ethical and responsible use of Artificial Intelligence (AI) tools in this course. By signing, you agree to uphold academic integrity and use AI only in ways that support your learning.

#### **1. Acceptable Use of AI**

- To explore solutions when I'm stuck on a problem.
- To better understand concepts or processes.
- To assist with tasks like background removal or object generation in design software (e.g., Adobe Photoshop).
- To brainstorm ideas or review code logic.

#### **2. Unacceptable Use of AI**

- Submit AI-generated work as my own without modification or understanding.
- Use AI to complete assignments dishonestly or bypass the learning process.
- Rely solely on AI for coding, design, or written responses without applying my own judgment.

#### **3. Academic Integrity**

- Suspicious submissions (e.g., overly clean code with perfect comments) may be reviewed.
- AI detection tools may be used to verify originality.
- If AI misuse is suspected, I may receive a zero and be asked to explain my work.
- If I demonstrate understanding, my grade may be reconsidered.
- First-time misuse may result in a chance to redo the assignment, at the instructor's discretion.

#### **4. Learning Commitment**

- The goal of this course is to build real-world problem-solving and design skills.
- AI is a tool—not a teacher—and cannot replace hands-on learning.
- Like building muscle at the gym, consistent effort is the only way to grow.

#### **5. Agreement**

By signing below, I agree to follow this AI usage policy and uphold the values of academic integrity and personal growth.

**Student Name:** Miguel Biselele

**Course:** Web Design & Development

**Instructor:** Manal Nasir

**Date:** January 21, 2026

**Signature:** Miguel Biselele
